Corvelle Bank

Mobile Banking, Security and Lost Cards

Customer information document — Effective January 1, 2026

1. Mobile App and Online Banking

The Corvelle app lets you check your balance, make transfers, pay bills, manage your cards, download statements and bank certificates, and chat with an advisor. Online banking is free for all customers.

To log in for the first time, download the app, enter your customer number and the activation code sent by SMS, then create a 6-digit passcode. You can then enable fingerprint or face recognition.

2. Lost or Stolen Card

Block your card immediately in the app under Cards > Block card. Blocking is instant and available 24/7. If you cannot access the app, call our 24/7 card service line printed on the back of your card and in the app's Help section.

Then order a replacement card in the app. If someone used your card, report the transactions in the app within 13 months; you are not liable for fraudulent transactions made after you blocked the card.

3. Protecting Yourself Against Fraud

Corvelle Bank will never ask you for your passcode, your full card number, your PIN or a confirmation code by phone, email or SMS. If someone asks for this information, it is a fraud attempt: hang up and report it in the app.

Only use the official app downloaded from the official app stores. Never click on links in SMS messages that ask you to 'update' or 'unblock' your account.

4. Disputing a Transaction

If you do not recognise a transaction, open it in the app and choose 'Dispute this transaction'. We respond within 15 working days. For card fraud, the amount is usually refunded temporarily within 5 working days while we investigate.

5. Complaints

You can submit a complaint in the app, at a branch, or by letter to the Customer Relations Department. We acknowledge every complaint within 2 working days and give a final answer within 30 days.
